

Lone Star Car Wash App – Using Wallet Funds

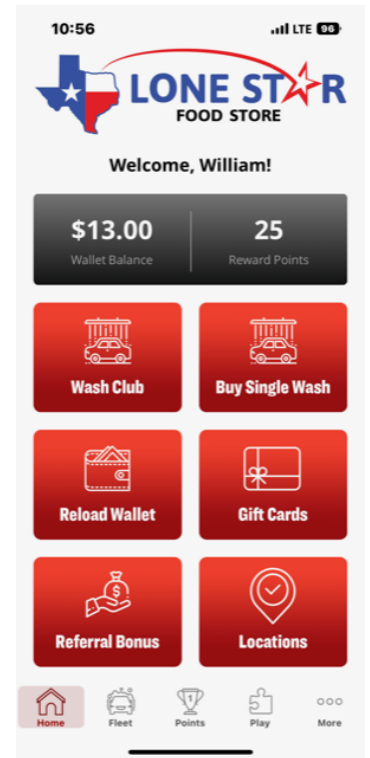

These instructions will help you buy car washes using wallet funds. Let's get started!

Before you start, verify your wallet has enough funds to purchase a wash – you will need a minimum of at least \$8. To check the balance, open the app and under the Welcome message you will see the balance (\$13 in this example). If you need to add more funds to the wallet, either press the “Wallet Balance” button OR press the “Reload Wallet” button. The app will take you through the process to add more funds.

In this example, we have enough funds (\$13) to move forward.

NOTE: you will want to be in the car wash line. Understand that the wash will not activate until you scan the activation QR code.

Press the “Buy Single Wash” button.

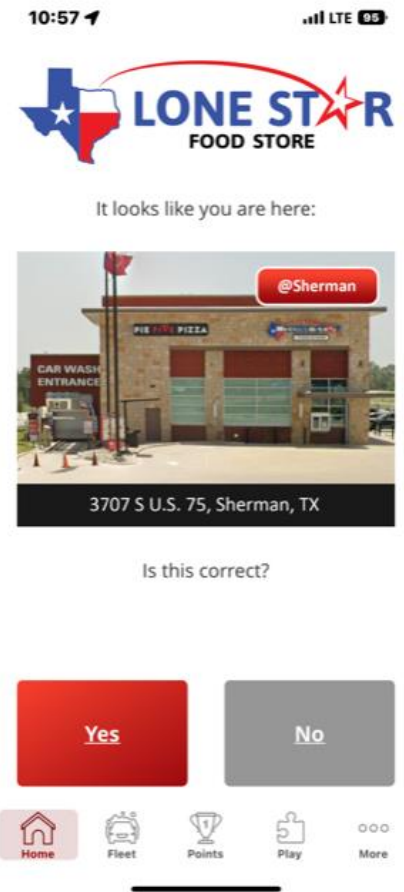

You will be prompted to “Check In”. This activates the location services on the phone and tells the system you are ready to “buy” a wash.

Remember, the wash will not activate until you scan the activation QR code.

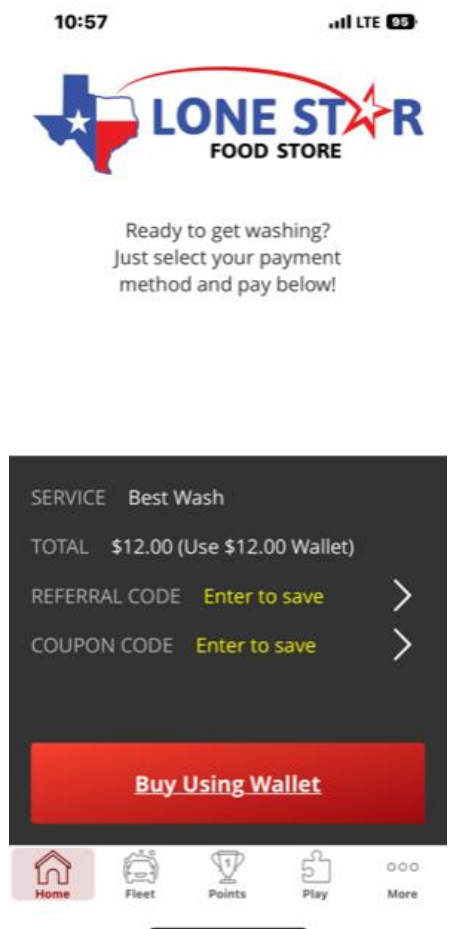

The app will verify that you are at the correct location by displaying a picture of the building. Press the “Yes” button for the next step.

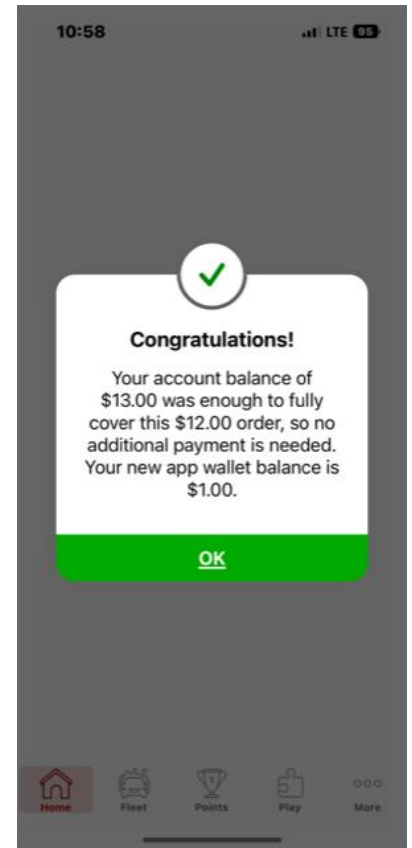

You are now asked to choose a wash type. You may choose from any wash displayed as long as you have the wallet funds to pay for it. Select your wash type by touching it.

Next, press the “Buy Using Wallet”. This will deduct the funds from your wallet balance.

You will receive a confirmation message – press “OK”.

Look for this QR code on the car wash pay station. You will be asked to scan it with your phone’s camera in the next step.

**APP USERS
SCAN HERE
TO ACTIVATE THE WASH**

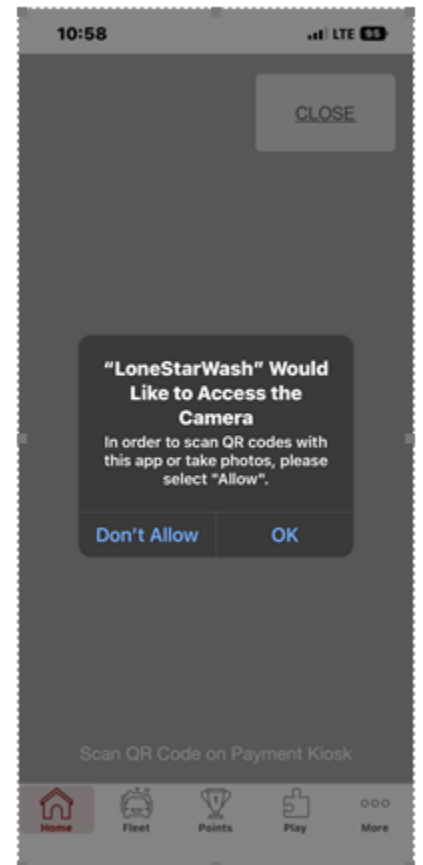

Text LONESTAR to 575-222-2201 to Get Our App

Press "Scan the QR code"

If this is the first time using the app, it will ask you for permission to access your camera. Select "OK".

You will receive a confirmation that the wash has been activated.

Congratulations!

Follow the instructions to safely enter the wash.
